Frontend Developer

Highly skilled Frontend Developer with a strong background in building scalable and user-friendly web applications. With expertise in React.js, TypeScript, JavaScript, and Node.js, I specialize in creating seamless user experiences and integrating APIs for high-performance applications. My experience spans fintech, e-commerce, and blockchain, having contributed to projects such as Evolve Credit's loan management system and Fusion HQ's POS and food delivery platform. With a passion for clean code, problem-solving, and building high-performance web interfaces, I am eager to drive innovation in frontend development.
